Visionary Apps LLC Launches Suite of iPhone Apps and the Most Advanced Interactive Foreclosure...

02.23.10, 09:52 AM EST

BusinessWire - Visionary Apps LLC (www.visionaryapps.com),

creators of innovative smart phone tools that aim to improve people's lives, today announced the launch of their suite of real estate-related smart phone applications, called the Complete Realty Suite. Released for the iPhone, iPad and iPod Touch, this first series of applications (apps) promise to revolutionize the way that people conduct their home buying searches, and the way real estate professionals connect with and assist potential homebuyers. Free to consumers, the suite includes three separate applications for download: Complete Foreclosures, Complete Homes and Complete Rentals. Most Web-based listing sites only offer a few hundred thousand listings, however these handheld apps hold over 1.6 million listings nationwide per app, for the most complete mobile database available.

"With the founding of Visionary Apps, our goal is to truly revolutionize the way people buy, sell and search for homes -- in particular foreclosures, which represent a tremendous value and the sale of which will help move us out of this crippling housing crisis," explained Dan Burrus, founder, technology forecaster and business strategist. "Our first series of apps empowers people with more information than they've ever had in the palm of their hand, and helps match them with their dream home or rental at the best price possible."

Complete Foreclosures

For consumers looking to find their dream home at a foreclosure price, the Complete Foreclosures real estate app allows users to access more than 1.6 million foreclosed, pre-foreclosed (short-sale), auction, and bank-owned homes throughout the nation right from their fingertips. The app provides each property's asking price, square footage, number of bedrooms and bathrooms, year built, housing type, and also includes a picture and satellite aerial view of each home, a detailed map, driving directions and much more. To help users

The Greenest Gasoline?

through the often complex home buying process, the app includes an intelligent, built-in step-by-step Foreclosure Buying Guide to navigate users towards a safe and informed purchase with as little hassle possible. The software also has the ability to access the smart phone's GPS chip to quickly locate homes on-the-go with an interactive map. To narrow choices, the app sorts homes by price, proximity, number of bedrooms, bathrooms, or other important features. For added convenience, users can instantly share listings with friends and family through a one-click email feature. When users are ready to make a purchase, the software has the ability to connect them with a licensed real estate foreclosure expert -- based on zip code to make sure they get a local rep that understands the foreclosure buying process and can advise them about the property in question.

For existing homeowners, the Complete Foreclosures app allows users to monitor and judge the health and economic well-being of their neighborhood and allows them to be the first to know about pre-foreclosure document filings from missed mortgage payments (homes that have been sent a notice of default). This is a must-have tool for serious real estate investors.

Powered by the same robust technology as the Complete Foreclosures app, the Complete Homes app provides easy access to 40-percent more listings than many other national home listing services,

offering details on a property's asking price, square footage, number of bedrooms and bathrooms, and much more through its intuitive and easy-to-use interface and streamlined design. In addition to a picture or aerial view of the home, the app can also recommend licensed, qualified, local real estate agents (from within the actual listing) to help buyer's make the best possible decision.

Complete Rentals

Similarly powerful and utilizing the same technology as Complete Foreclosures and Complete Homes, the Complete Rentals app offers instant search of hundreds of thousands of apartments and rental homes nationwide with the most advanced and user-friendly national listing service available in the App Store. In addition, apartment hunters can access local listings using their phone's GPS technology to view apartments and homes instantly from their current location (whether from the car or while out to lunch with friends). Once the user has
